

## Solution Team Lead

This is a client facing role which will require you to interact with third party solution providers, software vendors and client stakeholders in the development and implementation of creative solutions. Your role will be varied from solution design, development and customisation of resource adapters and workflow, schema design, coding and configuration as well as policy definition, solution documentation and client knowledge transfer and training. This role requires strong problem solving and lateral thinking skills.

This role is suited for Senior Identity Management Solution Specialists. The role encompasses many of the aspects of the Identity Management Specialist with a greater focus on solution design and team co-ordination. Essentially this role draws from aspects of Project Management, Solution Architect and Identity Management Solution Specialist roles. This role reports directly to Agreeon's Head of Professional Services.

Ideal candidates will possess:

- Tertiary qualifications in programming/software design; and
- Excellent written and verbal communication skills.
- 2 - 4 Years + Development Experience in Java, .Net or other OO language.
- Project experience in Banking & Finance or Telecommunications
- Strong experience with Web and Application servers.
- Experience in the Implementation of Provisioning, Web Access Control or Directory Services solutions.

If delivering complex and innovative solutions to the world's largest organisations excites you, then please forward your resume and a brief covering letter, referring to one of the Positions below, highlighting your particular experience and ambitions to Sharon White at [recruitment@agreeon.com.au](mailto:recruitment@agreeon.com.au).
